Racks Wanted!

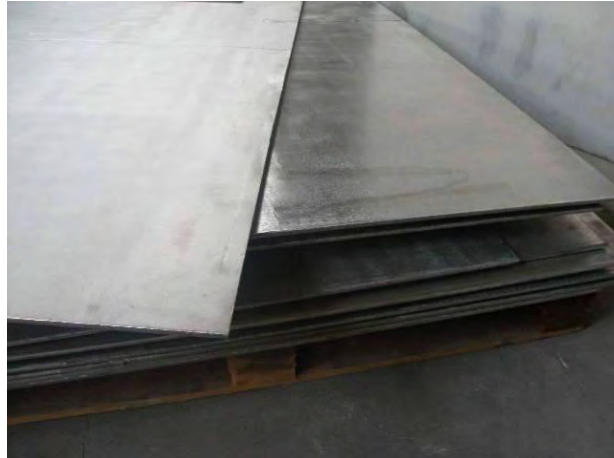

Our inventory is growing! Do you have racks like these that you would like to sell? Well, we would like to buy!

We are looking to buy up to 100 used Jarke style modular portable bar racks such as those pictured above, with or without hooks. We will consider other styles of racks as well. Please contact Jerry at: 419-473-2481.

**Service, Selection, &
Speed!
We've Got it All!**

Pre-Cut Sheet & Plate

Parker Steel now stocks pre-cut metric plate and sheet stock to better serve our customers. We responded to our customers needs for smaller sizes of plate and sheet due to wasted material by the customer. Now you can buy what you need with less waste.

Our pre-cut inventory ranges from 2mm up to 8 mm in thickness. We stock it in carbon, stainless, and aluminum. Our material is cut using a shear to ensure a high quality and efficient cut. We have a variety of dimensions to choose from such as 12 x 39, 24 x 39, 12 x 59, and 24 x 59. [Click here](#) to be directed to our pre-cut sheet and plate page or email us at: sales@MetricMetal.com for your inquiry.

Since most items are already in stock, your pre-cut sheet and plate orders can generally ship out the same business day.

7075 Aluminum
Round Bar and Plate

Did you know that Parker Steel is largest distributor of metric size metals in North America? It's true!

- **Experienced Sales Staff**
- **Low Minimum Purchase**
- **Fast Shipping**
- **HUGE Inventory**

We are ALWAYS looking to add new stock to our inventory, so feel free to send inquiries on items not shown in the [Reference Guide](#) or on [our website](#).

1-2 Day Shipping

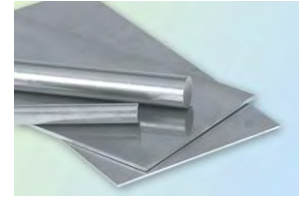

West and East Shipping Locations

Our newest warehouse in Fresno, California is stocked with our most popular items, and we continue to add more products regularly

If your order needs to ship to the West Coast, please be sure to ask your salesperson if that item is stocked in Fresno. If it is you will be ahead of the game, as items stocked in

Parker Steel now offers a 7075 grade Aluminum in metric [plate and bar stock](#).

The bar is a T6 temper cold drawn bar while the plate is a T651 temper hot rolled plate.

The 7000 series alloys are often used in transport applications, including marine, automotive and aviation due to their high strength-to-density ratio. Their strength and light weight features are also desirable in other fields such as rock climbing equipment, bicycle components and frames, camping knives and fork sets, and hang glider airframes. Hobby grade RC models also use 7075 aluminum for chassis plates and it's occasionally used for shafts in lacrosse sticks.

Other applications for this grade may include the aerospace industry, defense industry, aircraft fittings gears and shafts, fuse parts, meter shafts and gears, missile parts, regulating valve parts, worm gears, and keys. The advanced thermal properties and the ability to be highly polished also allow this material to be widely used in the mold tool manufacturing industry.

[Click here](#), [email](#) or call 1-800-333-4140 for more information. We will be adding product pages for these specific items soon.

Thank You

Your loyalty means the world to us. If you wish not to receive any more of our Parker Steel Quarterly Newsletters, please use the SafeUnsubscribe™ link at the bottom of this email, and we promise not to contact you again via email.

Happy Spring!

Fresno will ship to West Coast states faster and cheaper. Generally all of California can receive items in Fresno the next day while the rest of the west coast generally in 1-2 days. We have also expanded our operation hours to accommodate for our west coast customers. We are now open from 7:30 am-7:30pm EDT.

If your quantity exceeds the amount we stock in Fresno, no worries! We can always ship the remaining stock from one of our 3 Midwest locations.
