Metric Titanium Nuclear Industry Metals

Parker Steel is an established supplier to the nuclear industry. We have a full understanding of the strict requirements needed for the nuclear industry.

We carry commercially pure Grade 2 Titanium material in round bar ASTM B348, sheet ASTM B265, and round seamless tubing ASTM B338.

Metric Grade 2 Titanium Tubing

Titanium is recognized for its high strength-to-weight ratio. It is 30% stronger than steel, but is 50% lighter. It is also twice as strong as aluminum. Titanium is corrosion resistant, and is suitable for the aerospace, military, chemical processing, automotive, petroleum chemical processing, sporting goods, food, and even medical and jewelry industries. Titanium has hypoallergenic properties, and is nickel free.

Our material is DFARS compliant (Defense Federal Acquisition Regulation Supplement).

will make it easier for customers to browse our products, place quotes, and get important news and information from Parker Steel and the Steel industry. New to the site, a video page, which will continuously upload informational videos on a variety of subjects. Our videos teach how to convert inches to millimeters, how to measure channel flange, and more.

If you have any video ideas that would help you to answer your metric metal questions, please let us know.

West Coast Warehouse

Fresno, CA

Parker Steel's Western Region Warehouse, which opened last year, continues to expand its inventory. Located in Fresno, California, our newest distribution center is well positioned to provide new and existing customers with outstanding service, and rapid delivery. Due to our California location, we can now offer next day delivery to many western region customers, at no extra cost. Also, to better serve our western customers, our Sales department is now open from 7:30 am until 7:30 PM EDT.
