We Are Certified!

Parker Steel is the largest supplier of metric size metals in North America. It is our goal as a company to provide the highest quality metric metal products and services to you. Our friendly and knowledgeable staff will help you make the right decisions when it comes to your metric metal needs.

With our proud record of A.N.A.B., Alliance, and now C-TPAT (Customs Trade Partnership Against Terrorism) certifications, we can assure our customers an even higher quality of safety, security, and services. Just ask or [look on our site](#), and we can provide you with the documentation.

Dear Valued Customer,

After attending the MSCI (Metal Service Center Institute) conference in Boca Raton this month, we are very pleased to have learned that so many of our fellow steel suppliers are seeing growth in sales for the first quarter and that the global outlook predicts a steady incline for 2010 and beyond.

We wish you success in your business as well, and would like to thank you again, for your continued loyalty.

New Products

Parker Steel is the largest supplier of metric sized metals in North America. We stock over 5,000 line items and are constantly reviewing our inventory making additions and subtractions based on customer demand. Our Purchasing team works tirelessly to collect data representing our customer's needs. They strive to purchase the highest quality material to meet even the most demanding requirements.

Parker Steel now offers and stocks JIS sizes and grades of material in flat bars, beams, and channels. We have a wide selection to choose from in flat stock ranging from 9mm x 3mm to 200mm x 38mm. We also stock a variety of JIS sizes in both our Beams and Channels.

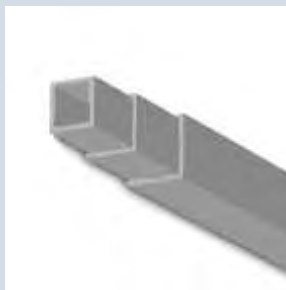

In the first quarter of 2010, we added 22 additional sizes of our round seamless stainless steel tubes, including 3 with outer diameters larger than 100mm. For the second quarter of the year we will focus on tubing with odd sized wall thicknesses. In the second half of the year we will be concentrating on DFAR compliant titanium and JIG plate.

Please check back frequently on our [New Products](#) pages to see new

offings at Parker Steel.

Additional Telescopic Tubing

In addition to the metric sized round and square telescopic tubing sizes introduced in 2009, we have most recently added new sizes in both aluminum and carbon.

We now carry metric round telescopic tubing sizes ranging from 15 mm OD to 75 mm OD with 2mm wall. Our square telescopic tubing sizes range from 15 x 15 up to 50 x 50 both with 2mm walls.
