### Website Redesign !

### Our New Look!

Please check us out at [www.MetricMetal.com](http://www.MetricMetal.com) to view our updated website.

Our new and improved site will make it easier for customers to browse our products, request quotes, and find important news and information from Parker Steel and the steel industry.

Thought we were fast before?  
With same day shipping on most orders, most quotes done within 1 hour and a

## Now Offering Plate Shearing

Plate Shearing Available Now

**Sheared Steel Strips**

Parker Steel has recently purchased and installed a 12 foot shear which cuts 1.5mm thick carbon, stainless and aluminum sheet and up to 15mm thick for carbon and 12mm thick for stainless steel and aluminum plate.

As with all production cutting an additional set-up and cut charge will be applied.

In addition, we are also developing a pre-cut stocking program to better serve our customers.

### Video: [How to Measure the Flange on I Beam & Channel](#)

We get a lot of questions presented to us from our customers who need to understand the specifics of our products. Although our sales force are not Metallurgists, we do have qualified staff to help answer some of your more puzzling or technical questions and concerns.

Stay tuned to our new [Videos Page](#) for segments starring Professor Ed Beam, who will enlighten you on the fundamentals of buying, measuring, and using metric steel. Do you have a question that could best be illustrated in the form of a video? [Let us know](#). We're always looking for new ideas!

## Thank You

We appreciate your time and value your opinion. If you have any suggestions, ideas, comments, or insight about our quarterly newsletter, we would love to hear your feedback.

Please contact our [Marketing Department](#) to communicate directly.

Have a fun, safe and successful summer season!
