### Dear Valued Customer,

We hope that the first quarter of 2011, is going well for all of you. As always, Parker Steel is continually expanding with new product and services. This year, we are launching all sorts of new projects. Please take a moment to read about some of these new ventures below.

Don't forget to download our brand new [2011 Reference Guide](#) or you can call or [email](#) to get a hard copy sent to you.

## Western Region Distribution Center Opening Soon

**New Warehouse  
Location: Fresno,  
California**

Parker Steel is pleased to announce the opening of our western region distribution center in Fresno, California.

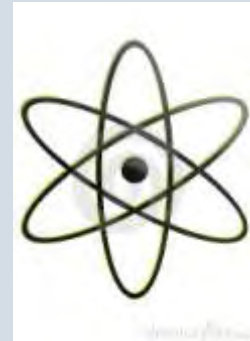

After recently acquiring a third warehouse in our headquarters of Toledo, Ohio, we realized that even further expansion was necessary to accommodate our many western based customers.

With the opening of the new warehouse, most California customers can get next day delivery, at no extra cost on items stocked in Fresno, and two day delivery to most of the Western United States.

President, Jerry Hidalgo, who spearheaded the project, says, "The expansion is driven by our desire to raise the level of service to our current and potential new western region customers, by reducing delivery times and lowering shipping costs."

The new Western Region Warehouse is currently being stocked, prepped and equipped, and is expected to be in full operation by

## Experienced Nuclear Industry Metals Supplier

Parker Steel is an established supplier to the nuclear industry. We have a full understanding of the strict requirements needed for the nuclear industry.

**ISO Certified!**

the beginning of the 2<sup>nd</sup> Quarter, 2011.

## CP Grade 2 Titanium

Parker Steel has Commercially Pure Grade 2 Titanium material in Round Bar ASTM B348, Sheet ASTM B265, and Round Seamless Tubing ASTM B338 for immediate shipment. As with all of our stock, Parker Steel will continue to expand this line over the coming year.

Titanium is recognized for its high strength-to-weight ratio. It is 30% stronger than steel, but is 50% lighter. It is also twice as strong as aluminum. Titanium is corrosion resistant, and is suitable for the aerospace, military, chemical processing, automotive, petroleum chemical processing, sporting goods, food, and even medical and jewelry industries. Titanium has hypoallergenic properties, and is nickel free. To see our current available stock in Titanium product, [click here](#).

Our material is DFARS compliant (Defense Federal Acquisition Regulation Supplement).

### Our Goal

Parker Steel is the largest supplier of metric size metals in North America. It is our goal as a company to provide the highest quality metric metal products and services to you. Our friendly and knowledgeable staff will help you make the right decisions when it comes to your metric metal needs.

We pride ourselves on fast delivery and superior customer service. More than 96% of our orders ship same day and have a low minimum order of only \$85.
