Specialty Tubing

Did you know that Parker Steel has a huge variety of specialty tubing?

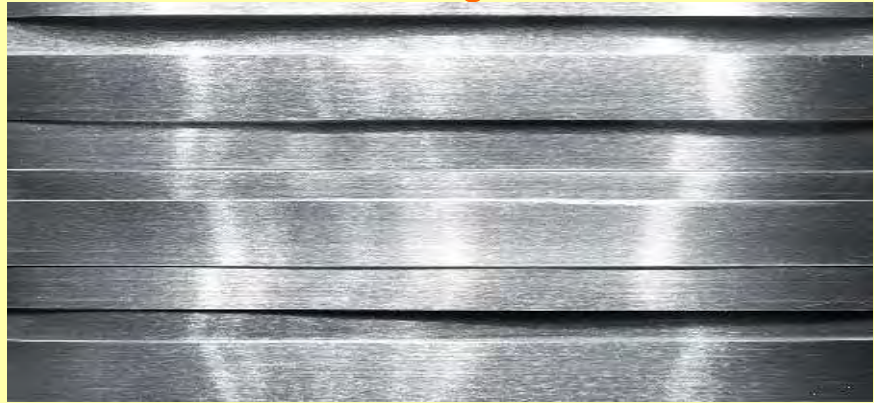

In a continuing effort to expand our inventory and services, we have added additional sizes of capillary, telescopic and oversized tubing.

Over the past few years. Telescopic tubing has proven to be a popular item in both [square](#) and [round](#) shapes. [Rectangular telescopic tubing](#) is next on our list of expansions. If there are any rectangular telescopic tubing sizes you are interested in, please [let us know](#).

Capillary tubing is often used in the medical and food industries and we have expanded our inventory in this area as well. Capillary sizes range from as small as .10 mm OD up to 6mm with varying wall thicknesses.

Our oversize tubing inventory is also growing. We now offer

Plate Shearing Available

Sheared Steel Strips

Since our recent purchase of a 12 foot shear we are now able to cut 1.5mm thick carbon, stainless and aluminum sheet and up to 15mm thick for carbon and 12mm thick for stainless steel and aluminum plate. Now we can cut plate material with a sharper edge and more accurately.

In addition, we are also developing a pre-cut stocking program to better serve our customers. Please let us know if there are particular pre cut sizes you would like to see us stock.

For more information, [click here](#) or contact the Sales Department with any questions at: sales@metricmetal.com or Toll Free at: 800-333-4140, or Fax: 419-471-2655.

West Coast Warehouse

1-2 Day Shipping

Now Parker Steel has 2 shipping locations in Toledo, Ohio and Fresno, California.

With the opening of our west coast location, we are able to ship material within 1 to 2 business days to most west coast states.

rectangular tubing up to 450 x 250mm, square tubing as large as 350mm, and round tubing up to 260mm OD.

Production Cutting Services

Free Cuts for Shipping

Parker Steel is well equipped with a high tech, computer operated Marvel™ band saws for your production cutting needs.

Our cut tolerance is 1/32". We are equipped to cut any item over 10mm thick.

We do not charge to cut items for shipping purposes however, additional charges may apply for production cuts (multiple precision cuts).

This means lower cost shipping, extended operation hours, and faster delivery for items stocked in Fresno, and next day delivery to most of California.

Thank You

We appreciate your time and value your opinion. If you have any suggestions, ideas, comments, or insight about our quarterly newsletter, we would love to hear your feedback. Please contact our Marketing Department to communicate directly.

Happy Fall!!
