## Huge Inventory of Stainless Steel

We offer a Huge Variety of Shapes and Grades

Among many other types of steel, Parker Steels stocks a huge variety of stainless steel bar, tube, and structural shapes. Within these shapes, a seemingly endless choice of grades and metric dimensions.

Our stainless steel round bar alone is offered in 8 different turned ground and polished (TGP) grades. Tubing is offered in a variety of grades and we offer everything from 1.8 mm OD capillary tube up to 273 mm OD tubing with varying wall thicknesses. We offer equal and unequal stainless angle as well as channel, T bar, shim stock, plate, and even threaded rod.

For your convenience our website publishes the chemistry and mechanical properties and tolerance charts of many of our stainless steel products. Give us a call and our sales team can fill you in on all details you would need.

## Our 2018 Reference Guide is Now Available

This guide is full of great information and in-depth detail regarding the specific grades and standards of all metal types for each product can be found. Tolerance charts, DIN and EN comparisons, mechanical properties, US vs. international standards, conversion and equivalency charts, information on finishes, pressure charts and more. Note that this is only a guide and does not necessarily reflect our current inventory, however we do stock nearly 6,000 line items and can order most anything else.
