White Paper- Parker Steel Company

Introduction

Parker Steel Company, headquartered in Toledo, Ohio, is a leading supplier of metric-sized metal products in North America. Established in 1955, the company has earned a reputation for providing high-quality steel and metal solutions to diverse industries, including manufacturing, automotive, aerospace, construction, and more.

Company Overview

Parker Steel specializes in the distribution of metric-sized steel materials. Unlike many domestic suppliers, Parker Steel maintains one of the largest inventories of metric metal products in North America, enabling customers to source hard-to-find metric sizes without long lead times or costly international shipping.

Key Facts

- **Founded:** 1955
- **Headquarters:** Toledo, Ohio
- **Specialty:** Metric-sized steel and metals
- **Customer Base:** Manufacturing, engineering, automotive, aerospace, construction
- **Certifications:** [ISO 9001:2015](#)

Product Offerings

Parker Steel offers a comprehensive range of metric-sized metal products, in a variety of shapes, including:

- **Carbon Steel:** Bars, tubes, sheets, angles, and channels
- **Stainless Steel:** Bars, tubes, sheets, and profiles
- **Aluminum:** Bars, tubes, profiles, plates, sheets, and threaded rod
- **Brass and Copper:** Bars, tubes, and sheets

All products are available in metric dimensions, with a variety of finishes and grades to meet the needs of engineers and manufacturers.

Market Differentiators

1. Unmatched Inventory

Parker Steel's warehouse in Toledo holds millions of pounds of metric steel ready for immediate shipment. This eliminates long waiting periods and minimizes downtime for customers.

2. Expertise in Metric Standards

Most North American suppliers focus on imperial-sized products. Parker Steel's focus on metric standards addresses a critical gap for manufacturers designing and building products for global markets.

3. Quality Assurance

Parker Steel is [ISO 9001:2015](#) certified, ensuring consistent quality, traceability, and documentation for all supplied materials. Material test reports and compliance certificates are available for most products.

4. Customer Service and Technical Support

Parker Steel's experienced sales and technical staff assist customers in finding the material they need for their projects, as quickly and efficiently as possible while maintaining the highest possible standards.

5. Secure Supply Chain

Parker Steel is proud to hold C-TPAT (Customs-Trade Partnership Against Terrorism) certification. This recognition from U.S. Customs and Border Protection demonstrates our commitment to securing our supply chain against threats and ensuring the safe, efficient movement of goods. C-TPAT certification means Parker Steel implements rigorous security measures throughout our operations, from sourcing to delivery, offering our customers added confidence in the integrity of our supply chain and expedited processing at the border.

6. Sustainability and Community Engagement

Parker Steel is committed to responsible business practices, including recycling programs, energy-efficient operations, and supporting local community initiatives in Toledo and beyond.

Conclusion

Parker Steel Company stands out as a trusted partner for businesses requiring metric-sized steel and metal products. With a vast inventory, technical expertise, and a commitment to quality and customer satisfaction, Parker Steel continues to support the growth and competitiveness of American industry.
